

```
// RF Transmitter Code

// For this project, use RadioHead (RH) library
// Link for RadioHead zip: https://www.airspayce.com/mikem/arduino/RadioHead/
// Used a video to help for this tutorial by DroneBot Workshop
// Video link: https://www.youtube.com/watch?v=b5C9SPVlU4U&t=780s

/*
  PLUG TRANSMITTER INTO PIN 12 ON BOARD
*/

// Have RH Amplitude Shift Keying (ASK)
#include <RH_ASK.h>

// Include dependent Serial Peripheral Interface (SPI) Library
#include <SPI.h>

// Create RH ASK Object
RH_ASK transmitter;

void setup()
{
  Serial.begin(9600);

  // Initialize ASK Object
  transmitter.init();
```

```
/*  
  
// DEBUGGING  
  
if (!transmitter.init())  
    Serial.println("Initialization Failed!");  
  
if (transmitter.init())  
    Serial.println("Initialization Successful!");  
*/  
  
}  
  
void loop()  
{  
    // Create 12-character string  
    const char coords[] = "X69ZZZZZZZZZZ";  
  
    transmitter.send((uint8_t*)coords, strlen(coords));  
    transmitter.waitPacketSent();  
  
    delay(1000);  
}
```
